[About this test](#)

For general information about a test procedure, click the "About this test" link above.

To see more information about a test result, select the "Details" tab. To compare test results over time, click "Past results" or "Graph of past results."

You may see an "A" (for abnormal), "H" or "HH" (for high), or "L" or "LL" (for low) in the "Flag" column. This means the test result is outside the normal range. Results a little bit outside this range are usually of no concern. Your doctor will discuss these results with you.
